DATE: 13 August 1957

FROM : Chief, OC-E []

25X1

SUBJECT: July Monthly Report, July 1957

1. Forwarded herewith is the Engineering Division monthly report for July 1957.

2. Our Competitive Evaluation Panels for the various categories of personnel in the Engineering Division have been at work on their lists and their work is substantially complete.

3. The Personnel Assignment Division has written letters to many of the colleges to which we expect to send interviewers this fall and has asked for confirmation of the October, November appointments which were arranged by telephone. Rather discouraging information has recently been received along the recruiting line - we have recently been told [] [] that they had to raise their salaries to \$475 per month to obtain graduating seniors. Our starting salary is \$445 per month.

4. An Engineering study on the location of a station [] for broadcasting programs to the [] to the [] was completed. This study showed that, because of the high ionospheric absorption in the [] could not be recommended as the site for the location of the station. [] is a much more preferable location (insofar as resulting signal strengths are concerned too).
